

ActivSlate 60 is a wireless, fully integrated, notebook-sized graphics tablet that brings control of the ActivBoard to every corner of the classroom. Using ActivSlate, teachers can instruct directly from inside group discussions or pass to students for input.

Why ActivSlate?

Teacher mobility — The ActivSlate is small enough to sit on a student desk, and is light enough to be carried into the centre of any discussion. Teachers have the freedom to interact with lessons, control applications and annotate content from anywhere in the classroom.

Ideal for all classroom discussions — The ActivSlate encourages students to interact with the teacher, their peers and the ActivBoard. It also gives teachers the last word with regard to control. They decide who has the floor and who waits for their turn by activating and deactivating slates.

Lower cost of ownership — The accessible, rechargeable and replaceable Lithium-Ion battery provides long-life. Instant-on ensures immediate interactivity and reliable, wireless connectivity while sleep-mode provides longer battery life.

ActivClassroom Integrated — Seamlessly integrated with ActivInspire, the ActivSlate enhances teachers' abilities to deliver truly interactive, digital lessons, while giving them the freedom to instruct from anywhere in the classroom.

Classroom ready:

- Durable, light and portable
- Long battery life
- Wireless

Interactive:

- Same functionality as an ActivBoard, but can be used anywhere in the classroom

ActivSlate
