

A group of children are gathered around a large, illuminated, touch-sensitive table. Their hands are touching the surface, which displays a colorful, abstract pattern. The children are wearing various clothing, including a green and white striped shirt and a blue t-shirt. One child is wearing a black watch, and another is wearing a blue watch. The background is blurred, showing other people and a bright light source.

Introducing the

ActivTable

A large, multi-user interactive table with a grid pattern. Several white cards with math problems are placed on the table. Hands of students are visible, interacting with the cards and the table surface. The problems include: $+2 = 7$, $+5 = 8$, $9 = 8 +$, $9 = 9 +$, $-2 = 6$, $-4 =$, $-6 = 7$, and a card labeled 'start'.

ENCOURAGE PROJECT-BASED COLLABORATION AND INTERACTION

The use of technology is a significant factor for schools in generating greater engagement amongst students, but what if it also increased opportunities for small group learning?

The Promethean ActivTable is a multi-user interactive table designed for small group learning where students interact and collaborate, sharing knowledge and working together toward a common goal.

A UNIQUELY POWERFUL TOOL FOR COLLABORATION

Multi-User Interaction

Large, touch-sensitive display supports up to six students collaborating simultaneously.

Educational Activities

Teachers and students have access to over 200 activities available in the ActivTable Activity Store.

Customizable Activities

Using the ActivTable Activity Builder, a free web-based application, teachers can create their own interactive multi-user activities.

Educational Applications

In conjunction with the ActivTable Activities Application, teachers can install their own educational applications using Windows®8.

Accessibility

Built to accommodate multiple chairs and wheelchairs.

Activity Reporting &Tracking Tools

Provide teachers the ability to view each student's work, time on task, collaboration tools used and more.

Integration with ActivInspire

Use ActivInspire flipcharts with multi-touch capability.

High Performance

Fast and easy-to-use technology that's designed to keep up with students.

Tool Library

The variety of intuitive tools, including keyboards, musical instruments, math tools and web browsers can be customized for each activity.
